26 May 1952.

Chief of Station, Vienna
Attn: L J and C
Chief, Salzburg Bass
Operational - USAGEN Project Proposals
NASA-1615, 1616, 1617, and 1614

1. As he pointed out in an informal note attached to
NASA-1615, it was C J's intention that all the
basic USAGE proposals go to Vienna for your perusal and con-
siderance or suggestions prior to being handed to Head-
quarters. Most unfortunately both C J and C
J have been out of the office a great deal in the past
few days, and NASA-1615, 1616, and 1617 were pouches di-
rectly to Headquarters. We regret this accident and hope
that there was nothing in either of these three dispatches
with which you seriously disagreed.

2. Fortunately, the two dispatches which were most apt to contain disputable points were MASA-1618 and 1614. MASA-1618, "USACE - Salzburg Base Assessment", was pouchued to you in its entirety, and MSA-1614, "USACE - Developmental Project Outline - CSE", is being pouchued to you today with the Headquarters copies for your forwarding if you approve.
